DOOR PARTS & RAIL SYSTEMS

CLOSE AND IN MOTION

## GASPACK, YOUR PARTNER

## IN RAIL SYSTEMS AND DOOR PARTS

### Total package

We supply **everything required** for you to produce hermetic sliding doors. Besides various types of rail systems we produce drive units, doorframes, door fittings and sealing rubbers. Originally, our company has developed and manufactured doors and that experience enables us to offer the right solutions to our customers.

### Order online

Placing an order or requesting a quotation? You can do that quick and easy in the Gaspack webshop. The webshop allows you to **easily configure a rail system fully suited to your requirements** and shows you the net prices. We supply drive units, doorframes, handles, sealing rubbers and spare parts. In the webshop you find a range of products, but should you need any help we are always available to assist you on the phone or by email.

### Made to order

Rail systems, drive units and doorframes are produced according to **customer specifications**. We supply rail systems for all door widths, numerous options and accessories for the drive unit and several types of wall mounting brackets. All that is left for you to do is installing the rail system at the customer.

### In-house developed

Our rail systems are designed by the Gaspack R&D department and are produced in-house. Besides **product development**, the R&D department supports customers with product integration and are able to develop customer specific products as well.

### High quality

Our rail systems and doorframes are made from **high-quality aluminium** which is anodised after being extruded. This results in light-weight, corrosion resistant, low-maintenance and **easy to install** products.

### Short delivery times

We produce **made to order** and have a keen eye for efficiency. Results? Short delivery times!

### Easy to install

We combine customer request with **simplicity and efficiency!** Once delivered to the end user, the only thing left is installing, levelling and setting up the controller and motor if applicable.

### Rail systems

**Each door is different!** Our product range consists of several rail systems. The difference? Carrying capacity!

### Outsourcing no option?

Besides supplying fully assembled rail systems, we can supply the profiles in different lengths. With an adequate sawing installation, sufficient operating space and skilled technicians you are able to **assemble rail systems, doors and doorframes yourself**.

## WELCOME

## TO GASPACK

For over **25 years**, Gaspack has been the **specialist** in the area of rail systems and door parts for hermetic doors for use in clean rooms, freezer rooms and cold stores. From our production facility in Zwaagdijk-Oost, the Netherlands we deliver the total package of **high-end products** for the production of hermetic doors **worldwide**.

### The Gaspack product range:

- ✓ Rail systems
- ✓ Drive units
- ✓ Doorframes
- ✓ Door profiles
- ✓ Sliding and hinged door fittings
- ✓ Sealing rubbers

The entire product range is developed **in-house and produced 'made to order'**. Besides standard configurations we have a fully equipped R&D department with test facilities to develop customer **specific products**.
