

ENFORCETAC

BLACKBOX

DARK - DARKER - BLACKBOX

We ensure the visibility of your products – if necessary even in total darkness. In the new BLACKBOX, we offer you the opportunity to demonstrate the performance of your equipment, which have been specially designed for low-light scenarios or the detection of temperature profiles, in a suitable environment.

Targeted product presentations for your customers

With the BLACKBOX as a platform, you can present your thermal imaging devices, residual light amplifiers, torches, optronics, laser light modules and other suitable products to a small, confidential circle of interested parties. For this purpose, a darkened room is available.

Being fast pays off

Please note that **the number of spots is limited**. Therefore, the offer is only valid as long as there is capacity. Please also take into account that due to the size of the container, only a few people can be in the BLACKBOX at the same time.
